

U.S. PATENT NO. 6,185,683	35 U.S.C. §112 Violations
2. A system including:	
(a) a first apparatus including,	The claim is indefinite as to which of the recited elements are included in the "first apparatus."
(1) user controls ,	The term "user controls" is indefinite as it is susceptible of more than one meaning as phrased.
(2) a communications port,	
(3) a processor,	
(4) a memory storing:	The term "memory" is indefinite as it is susceptible of more than one meaning as to the type of memory contemplates. It is also indefinite as to whether it encompasses or excludes storage that is not directly addressable by the processor.
(i) a first secure container containing a governed item , the first secure container governed item being at least in part encrypted ; the first secure container having been received from a second apparatus ;	<p>The term "secure container" is indefinite on its structure and certain of its functions, and as to whether it encompasses or excludes "virtual container." It also lacks an adequate written description, as it also lacks an adequate written description as the specification does not disclose an adequate corresponding structure. Moreover, it is not defined in the specification and has no ordinary meaning.</p> <p>The term "container" is indefinite on its structure and certain of its functions, and on what distinguishes a single "container" from multiple "containers." It also lacks an adequate written description.</p> <p>The term "secure" is indefinite. It is an amorphous term that lacks an adequate written description as the specification provides no definition and uses the term inconsistently.</p> <p>The phrase "storing . . . secure container" is indefinite in that it is not clear what part, if any, of the "container" may merely be referenced within the "memory."</p> <p>The term "containing" is indefinite and lacks an adequate written description as it is used inconsistently in the allegedly incorporated specification.</p> <p>The term "govern" is indefinite and does not conform to the written description requirement as its scope exceeds that which is disclosed in the specification.</p> <p>The term "a governed item" is indefinite on what distinguishes "a governed item" from two separate "governed items."</p> <p>The phrase "first secure container governed item" is indefinite as it is susceptible of multiple meanings. It is not clear whether the limitation requires an item being "governed" by the "secure container," or a "governed item" in the "secure container."</p> <p>The phrase "first secure container governed item being at least in part encrypted" is indefinite as it is susceptible of multiple meanings. It is not clear whether the "secure container" or the "governed item" is encrypted.</p> <p>The term "received" is indefinite on what processing, if any, is</p>
